The **Team Roster** pulls player data from the official roster and is used by teams and referees in the **Match Report**. Only coaches have access to enter jersey numbers. Administrators can add and delete players from a team roster. If you coach more than one team, select the team from the dropdown list to display roster. Jersey numbers are entered in the box next to the player's name. Click **Save** to update the jersey numbers.

## My Match Reports

**Match Reports** are the official report of the game between two teams. Referees use the report to check in the players before the game and record the score after the game. Only players on the Match Report should be playing in the game. Coaches are responsible for verifying the accuracy of the roster. If there are any players not on your match report, the coach should notify a Board member who can then add the player to the official roster. Using the Roster feature, the coach must enter the jersey number for each player, so the referee does not have to check numbers before kickoff.

To view the match report for a specific game, click on the icon next to the desired game under the M/R column. That will open a new window with the report. Print two copies of the report for each game. The home team is required to provide copies to the referee prior to the game. It is recommended the visiting team print at least one copy in the event there is an issue with the home team.
